Pinecone

Languages

Yoruba (Full Professional)
English (Full Professional)

Certifications

Geographic Information System (GIS Mobile)
AI For Everyone
12 Factor App
IWCF Level 1
Certificate in Digital Marketing

Honors-Awards

Agbami Medical and Engineering Scholarship Award
Gilead Trust Award
Certificate in Digital Marketing
Mol Freshhh
Winner 2019 Sowsco Petroquiz

Seunfunmi Adegoke

Software Engineer | Generative AI & LLM Systems | Backend & Cloud Infrastructure | Product Engineering
Lisbon, Lisbon, Portugal

Summary

I'm a mission-driven software engineer passionate about building impactful applications. I specialize in designing backend systems, deploying scalable cloud infrastructure, and integrating large language models (LLMs) into production environments.

My technical toolkit includes:

Languages & Frameworks: Python, JavaScript, R, Bash, Django, Flask, FastAPI, React

AI/LLM Tools: Langchain, Hugging Face, OpenAI API, GPT-4, Vertex AI, Gemini Pro, LLaMA, Langfuse

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Chroma, Qdrant, Weaviate, Pinecone

☁️# Cloud & DevOps: AWS, GCP, Azure, Docker, Kubernetes, CI/CD (GitHub Actions, Travis CI), Serverless

Concepts & Practices: RAG, Prompt Engineering, Prompt Injection, Conversational Design, Model Evaluation (F1, Accuracy, Precision, Recall)

I thrive in fast-paced, high-ownership environments and enjoy solving complex problems with a practical, user-centered approach.

I believe in Shoshin (初心), the “beginner's mind”, as a lifelong principle. I'm always learning, iterating, and looking for ways to ship better software that solves real problems.

Let's connect if you're building something meaningful in AI, cloud infrastructure, or frontier tech.

Experience

Turing
AI Engineer

January 2023 - Present (2 years 8 months)

Wyreng.com

Software Engineer

December 2022 - June 2023 (7 months)

- ❖ Developed a fault-tolerant, scalable, and responsive backend application for solar house systems that provides critical performance information, energy generation, consumption and storage, and historical reports for insights into energy usage and cost savings.
- ❖ Designed and implemented, the websocket layer that handles real-time communication between the server and IOT enabled solar house devices , resulting in a 32% reduction in data transfer latency.
- ❖ Improved dashboard reporting by writing efficient ORM queries, resulting in a 7% increase in reporting accuracy and a 12% reduction in dashboard loading times.
- ❖ Built and managed CI/CD pipelines using GitHub Actions to ensure code is continuously integrated, tested, and deployed to Digital Ocean Droplets, reducing the risk of bugs and ensuring a smooth development process, resulting in a 20% reduction in release cycles.

Sendme.ng

Software Engineer

January 2022 - January 2023 (1 year 1 month)

- ❖ Worked on the e-commerce team building and managing the e-commerce platform: order.sendme.ng.
- ❖ Designed and implemented the backend service for an internal payment checkout system deployed on AWS and Heroku, resulting in a 42% reduction in customer transaction-related fraud.
- ❖ Built and designed the backend service for the company's affiliate system, leading to a 22% increase in product sales.
- ❖ Built and managed the backend infrastructure powering the mobile application used for delivery and logistics management, contributing to a 45% reduction in delivery time.

- ❖ Integrated various payment gateway services and implemented secure payment verification for each payment service integration on the e-commerce application's payment service.
- ❖ Managed the backend ERP application for animal protein processing facilities, supporting the processing and cold chain storage operations.
- ❖ Implemented a socket.io web server for a real-time low latency social commerce application powering the company's chatbot service, using Django and Socket.io.
- ❖ Set up efficient logging on the socket.io server and triaged bugs in a timely manner.

Udacity

Cloud Developer Session Lead

June 2022 - November 2022 (6 months)

United States

- ❖ Mentoring and coordinating 180+ students, teaching them the concepts of cloud development using AWS services like AWS Elastic Kubernetes Service (AWS EKS), AWS Lambda, AWS CloudFormation, AWS Elastic Beanstalk, AWS Command Line Interface (CLI), Amazon VPC, Amazon Relational Database Service (RDS), AWS Identity and Access Management (AWS IAM), Docker, Docker Compose, Kubernetes, Travis CI.
- ❖ Reporting student's attendance and progress to the Mentor's dashboard as well as weekly observations on each session to the Udacity team.
- ❖ Providing technical guidance to students and helping prepare them for roles in the Nanodegree discipline with role-based group exercises.
- ❖ Building community amongst the students with facilitated activities and events.

Education
